Why did you choose to study in the School of the Environment?

I love nature and I wanted to learn more about it, especially regarding the current climate issues.

What is your favourite memory from your time with the School?

I enjoyed participating in multiple environmentally related events hosted by the School and student organizations.
What have you learned about yourself through the program?

I have discovered not only more love for the environment, but also more love for myself.

Do you have any advice for incoming students?

Embrace what you love and be willing to take risks.

What are your plans upon graduation?

I would like to enter the field of sustainable event planning and perhaps consultancy, working with people to educate them about the environment and encourage sustainable behaviours.
